

WOODTRENDS WOODGRILLE™ is a traditional linear wall and ceiling product that combines the warmth of wood with excellent acoustical values. We utilize a Class A fire rated no added formaldehyde MDF core covered with your choice of veneer to maximize your finish offerings and to offer straighter lines than solid wood options.

OPTIONS:

- Typical Grille sections are 12” wide by 8’ long
- Arrangements of 4, 6 or 8 blades per 12” section are standard
- Blades are typically 1 ½”, 2”, 2 ½” or 3” thick

FINISHES:

- 24 Standard & 40 custom veneers available
- Clear satin lacquer is the standard finish

INSTALLATION:

Convertible for walls or ceiling arrangements, our proprietary attachment clip provides a solid mounting option along with the ability to access equipment above or behind the grilles. Standard installation will have our attachment clip suspended from a heavy duty 15/16” T-Grid. Installation is simple and the attachment clips works with both the backer and dowel designs.

- Recessed Wood backer: The black hardwood recessed backer holds the blades securely while disappearing into the background above.
- Dowel Design: The dowels are often used in open plenum designs where the dowel itself becomes a design element. There are two dowel options. A hardwood (fixed) or a PVC (flexible) option.

ACOUSTICS:

As with all Sound Seal products, acoustical performance is at the forefront during the design phase of the products. Different acoustical materials can be used both above and behind the grilles to garner acoustical results

- Soundtex acoustic textile can easily and affordably be added to the back of the grilles
- Sound Quality black theater board can be incorporated into the design to enhance the acoustical performance

LEED INFO:

- Credits for MR 4.1, MR 4.2, MR 7, EQ 4.4
- No added Formaldehyde
- FSC certified and offers a chain-of-custody proof of origin

WARRANTY:

All WoodTrends products come standard with a full one year warranty for manufacturing defects and dimensional stability.
