WOODTRENDS
ACOUSTICAL WOOD WALLS & CEILINGS
WoodTrends Wood Wall and Ceiling Panels incorporate a variety of configurations to meet the majority of acoustical requirements. Though flat, rigid materials are inherently reflective, balancing sound reflection and absorption is achieved through perforation. Perforated rigid materials on WoodTrends Wood Walls and Wood Ceilings use absorptive backings. WoodTrends Wood Walls and Ceilings offer aesthetically pleasing finishes along with exceptional acoustic performance.

WoodTrends Wood Walls and Ceilings offer a variety of perforation and veneer finishes. WoodTrends panel & planks wall and ceiling systems show the beauty of real wood with the added benefit of acoustic performance. Our panels and planks are available for wood wall and wood ceiling applications and utilize standard industry mounting components. WoodTrends Panels are available in six different systems for wood walls and/or wood ceilings in a variety of popular as well as exotic wood veneer species.
A traditional linear wall and ceiling product, WoodGrille combines the warmth of wood with excellent acoustical values. Veneered MDF is used to make the WoodGrille panels, which incorporate different blade sizes and spacing.

Typically WoodGrille is available in 1’ wide by 8’ long panels with arrangements featuring two to eight blades per panel. The standard finish is a natural clear lacquer. There are 24 standard and 40 custom veneers available, which allows for customization of the WoodGrille product to fit any design layout.

**FEATURES:**

- Class A fire rated, CARB2
- Dowel or backer type assembly based on application
- Typical blade widths of 5/8", 3/4", 1" or 1-1/4"
- Typical blade heights of 1-3/4", 2-1/8", 2-1/2" or 3-1/8"
- Custom sizes available

WoodTrends Linear for Walls & Ceilings features a continuous aesthetic look with parallel straight lines and can achieve NRC values as high as .90.

The system is built on an MDF core and the veneer is finished with two coats of a UV-polyacrylate lacquer. This system can be provided in either planks or panels. WoodTrends Linear for Walls & Ceilings is offered with a reveal edge or flush edge detail. The Flush Edge detail leaves a standard 2 mm groove between planks. Custom reveals are also available.

FEATURES:

- Plank widths available from 2-1/2” up to 12”
- Plank lengths available up to 120”
- Reveal widths available from hairline up to 1-3/16”
- Acoustical textile at reveal provides acoustical performance
- Planks can be perforated for even higher NRC ratings
WoodTrends Standard for Walls & Ceilings is a traditional wall panel product that combines the warmth of wood with excellent acoustical values; either acoustically reflective or absorptive when perforated. The product consists of a MDF core material with a face veneer and a rear balancing veneer. The applied finish is two coats of UV-polyacrylate clear lacquer.

WoodTrends Standard for Walls & Ceilings features a panel or plank size made to order with perforations or grooves able to achieve NRC values as high as .90.

FEATURES:

- Class A fire rated, CARB2
- Concealed mounting hardware
- Multiple finish options available
- Panel widths up to 4’, lengths up to 10’

Built on the concept of creating high-performance acoustical products with exceptional aesthetic value, WoodTrends Topline Acoustical Wood Planks incorporate a variety of configurations to meet every acoustical requirement. Though flat, rigid materials are inherently reflective, balancing sound reflection and absorption is achieved through perforation. Perforated rigid materials, in conjunction with absorptive backings, allow for aesthetically pleasing finishes along with exceptional acoustic performance.

Whether driven primarily by acoustics, aesthetics, or both, Topline’s selection of groove widths and spacings will satisfy even the most demanding requirements.

FEATURES:

- Class A fire rated, CARB2
- Typical plank size is 5” x 96” long
- Custom sizes available
- Tongue & Groove edge detail
- Monolithic appearance

WoodTrends Select is a genuine wood veneered concealed grid ceiling panel system. Installed on typical z-bar, WoodTrends Select provides for a continuous ceiling with panels defined by a small 2mm bevel on all edges. This system can be designed to complement casework, doors, and even furniture.

Custom staining is available, as well as the 24 standard and 40 custom veneers that are offered. State of the art CNC machinery produces the selection of perforation, slot, or groove patterns that achieve NRC values as high as .90. Where design dictates non-perforated, reflective panels are also available.

FEATURES:

- Class A fire rated, CARB2
- MDF core
- Standard sizes 2’ x 2’, 2’ x 4’, 1’ x 6’
- Custom sizes available
WoodTrends Basic ceiling panels feature a genuine wood veneer on a MDF substrate with a generic balancing veneer on the back side. The Basic is a lay-in style panel with a tegular edge detail designed for installation in a standard intermediate duty 15/16” or 9/16” T-grid. State of the art CNC machinery produces round or elongated perforations to achieve optimum acoustical results.

In addition to the Basic ceiling panel, WoodTrends offers the Basic Plus. The Basic panel incorporates a rabbeted edge detail on all four sides while the Basic Plus panels uses a square edge with matching edge banding on all sides.

FEATURES:

• Class A fire rated, CARB2
• MDF core
• Standard sizes 2’ x 2’, 2’ x 4’, 1’ x 6’
• Custom sizes available
• Custom edge details available for compatibility with non-standard grids
WoodTrends Elite is a genuine wood veneered ceiling panel system which installs easily into a standard 15/16” T-grid, leaving a 3/8” pencil line reveal between panels. This system is built on MDF core with a .6 mm veneer thickness.

WoodTrends Elite Ceiling Tiles offer downward accessibility by utilizing a unique compression spring technology that allows for zero clearance above the grid and easy accessibility.

FEATURES:

- Class A fire rated
- MDF core
- Standard sizes 2’ x 2’, 2’ x 4’, 1’ x 6’
- Custom sizes available
- NRC values as high as .90
The perforations in the WoodTrends products can achieve NRC ratings as high as .90. The larger the holes or the higher the number of holes, the more open air space within the product resulting in better acoustical values.

- Nano-Perforation .5 mm holes
- Micro-Perforation 1.5 mm holes
- Standard Perforations range from 3 mm up to 9 mm holes
- Irregular hole spacing is available
- Custom perforations are available
- Slots are available in place of holes
- Non-Perforated options available for aesthetic use only

WoodTrends systems are available in a wide variety of wood veneer options. Over 40 standard veneer options are available. In addition to standard veneer options, numerous exotic and custom species are available as well.

FEATURES:

• Organic wood veneers — offer natural beauty
• Engineered wood veneers — uniform and consistent grain offerings and color
• Clear lacquer finish
• FSC Certified
